LIGHTING CAN TURN SPACES INTO EXPERIENCES

Using the captivating power of light, we change the way people see or react to buildings, environments and the space around them.

Interdisciplinary

Facades

Landscapes

Cityscapes

Zumtobel makes the normal interesting. We make icons iconic. We make the exciting amazing and the impressive unbelievable. Our combination of high quality engineering, attention to detail and technical expertise enable our customers to be creative with light.

Through an uncompromising commitment to design and innovation, we have established ourselves as a global leader in LED lighting for the architectural, hospitality and residential markets..

RANGE OVERVIEW

VISTA FLEX Top Bend

VISTA FLEX Side Bend

VISTA FLEX HIGHLIGHTS

A range of flexible linear IP67 marker lights available in a variety of colors, sizes and bending directions.

DURABILITY

High-grade silicone material provides long-lasting performance over the rated lifetime, even in extreme weather conditions.

AESTHETICS

Dot free continuous clean lines, end-to-end mounting and a seamless lit appearance.

VERSATILITY

Available in a choice of colors: CCT, Tunable White, RGBW and PIXEL. Different bend options, connection feeds and complementary mounting accessories result in a fast and reliable installation.

Diffused 120°

Average 550 lumens per meter (3.28')

L70 50,000 hours @ 122°F

Façades and building surrounds

**AN UNINTERRUPTED
HOMOGENEOUS LINE
OF LIGHT.**

Dot free continuous clean lines. End-to-end mounting and seamless lit appearance.

CONSTRUCTION

The use of silicone material and clever design ensures a continuous line of light when installed end-to-end.

MOUNTING ACCESSORY

VISTA FLEX is available with an aluminium profile to help you achieve a straight line of light for your project, see page 18 for more details.

SEAMLESS CONNECTION

Injection moulded end caps with various direction options allow the cable to be hidden and achieve a seamless connection. Cable entry options: front, bottom and side, see page 17 for more details.

Extruded
high-grade Silicone

Injection
moulded
end caps

Anti-transpiration
block

LONG-LASTING PERFORMANCE. PEACE OF MIND.

IP67
IK07

VISTA FLEX is built using a high-grade silicone material giving the product enhanced properties for a long-lasting performance.

CONSTRUCTION

Extruded high-grade silicone body; UV resistant, non-yellowing and water repellent. Outperform conventional material at high and low temperature.

END CAPS

Injection moulded end caps mean no water ingress to ensure the long-term integrity of the system.

ANTI-TRANSPARATION BLOCK

In many wire and cable applications, water and moisture migrate through the conductors shorting out and permanently damaging electronic circuitry (capillary effect). The result is expensive repair and replacement costs.

The solution? An anti-transpiration block on the cable. The silicone fills the voids between the conductor strands thus blocking the ability of fluid or moisture to seep through.

EXTREME ENVIRONMENTS

Suitable for extreme external environments ranging from -13°F to +113°F.

Top Bend

Side Bend

Bending diameter: 240mm

Bending diameter: 9.4"

(both versions)

FLEXIBILITY. DESIGN FREEDOM.

VISTA FLEX is an incredibly versatile and flexible lighting system offering unrivalled design possibilities.

BEND OPTIONS AND SIZES

Available in two bending directions, top and side bend, to integrate seamlessly in any outdoor architectural applications.

Standard metric lengths available:

0.3, 0.6, 0.9, 1.2, 3, 6, 10m.
(.98', 1.96', 2.95', 3.93', 9.84', 19.68', 32.8')

Bending diameter: 9.4" both versions.

COLORS AND CONTROL OPTIONS

Choose from different color temperatures; 2700K, 3000K, 4000K, Tunable White or RGBW.

To create stunning color chasing scenes opt for the PIXEL option.

Control methods available: on/off, 0-10V, DALI and DMX. Remote driver.

SEAMLESS INSTALLATION

Options of connection entries and mounting accessories; mounting clips and aluminium profile for an easy and reliable installation.

With a collaborative and flexible approach, we go out of our way to provide an outstanding experience for our customers.

Description:

VISTA FLEX, 3m (9.84') length, RGBW, side bend, white, side cable entry, end cable exit. 96 watt driver, on/off

CABLE ENTRY OPTIONS

Note: If you order a front side or bottom loop version you will get the corresponding cable exit.

HOW TO SPECIFY VISTA FLEX LX

PRODUCT SELECTION

Each length of VISTA FLEX is supplied with a 1m (3.28') lead. Select the correct bend product for your application, if the wrong bend is selected it will not bend in the orientation you want it to.

The input cable orientation needs to be selected here also, often back feed will be required but this need to be taken into account as once you receive the product this can't be changed.

INSTALLATION

Please install the product as per the install guide. Care should be taken when removing the product from the reel, do not twist the product or bend in the wrong direction. IP rated junction boxes and T-tubes should be supplied by the installer. IP rated boxes should also be supplied by the installer for drivers and controllers.

PRODUCT LENGTH

Where possible order the exact length of product required i.e. 3.6m (11.81')
length = $x1 - 3m (9.84')$ reel + $x1 - 0.6m (1.97')$ reel.

CUTTING

Cut to length: If it is not possible to order exactly the correct length order as close as possible and check the cut increments of the variant you have selected. Make sure you order an end cap kit plus a cutting tool.

MOUNTING ACCESSORIES

- > The product should be mounted using either the mounting clips or the extrusion.
- > Quantity of clips will depend on the pattern you are installing, minimum required will be at beginning, mid and end of each bend and at start and end of run.
- > It is advised if you want to achieve a straight run to use the aluminium extrusion.
- > The number of clips required will depend on the application of the product. i.e. mounted horizontal or vertical.

DRIVER AND CONTROL

Select the correct driver and if Tunable White / RGBW / PIXEL variant of VISTA FLEX is specified a DMX / DALI controller will be required.
