

The recessed CARDAN LED blends into interiors almost unnoticed. The frame and luminaire housing, both painted in a discreet finish, form a delicate envelope for the lighting head, which appears to float freely inside. There is no undesirable “black hole” in the ceiling, and the luminaire remains perfectly unobtrusive.

CARDAN LED

Adjustable Performance Lighting

CARDAN LED

Adjustable Performance

With two shapes and wattages available, CARDAN LED is ideally suitable for many different applications. The consistent appearance creates a calm ambience in the room: even when fully adjusted, the trim barely protrudes below the ceiling plane. CARDAN LED is a veritable lighting power package.

Specially-designed gimbal rings allow up to 30° of adjustability, with the trim barely protruding below the ceiling plane.
