

ZUMTOBEL

CLARIS evolution

Modern workplace lighting from a timeless luminaire

Its straightforward and geometric design makes CLARIS a classic for office lighting, helping it fit effortlessly into any office architecture. A tasteful design alternative to luminaires with continuous opal optics, CLARIS evolution looks particularly light and slim.

Pure Minimalism

Offices

Conference Rooms

Libraries

Classrooms

Four by Six Combinations

CLARIS evolution offers the chance to really differentiate from the norm. With a personal touch, offices benefit from a comfortable atmosphere. The choice of glossy or matt reflectors can also influence the lighting effect. For example, a shiny silver reflector casts no hard shadows, while a matt white reflector lets the luminaire and room shine in soft light.

Housing Colors

Aluminium pressed precisely onto the edge lays the foundation for new color finishes in a straightforward design.

White | Silver | Black | Bronze

Matt and Glossy Reflectors

Following the principle of a modular system, the reflector can combine any color with a matt or shiny surface.

2 x White | 2 x Silver | 2 x Black

The combination of double-sided LED printed circuit board, light chamber, micro-prismatic optics and free-form reflector provides workplaces with excellent light. Good glare-free light at UGR < 16 is a real blessing for the eye. The high indirect component with a wide-angle batwing light distribution brightens up the ceiling – even with short pendant lengths – and generates a pleasant atmosphere in the space. Thanks to its excellent efficiency of up to 129 lumens per watt, CLARIS also offers a welcome opportunity to save costs.
