  - CONTROLS: Switch, DALI, wireless
  - SHAPES: Square, round, custom
  - 139 – 1254 lm / sf
  - Lambertian light distribution

## CIELUMA Acoustic

You employ your creativity and shape the design of the space.  
We provide the illuminated ceiling or wall that fulfills your requirements.

When it comes to CIELUMA, there is no pre-defined standard design. Rather, each product is unique and is made to your specific dimensions. The textile block modules can be made to impressive dimensions – up to 246 feet long and 16 feet wide. Whether the modules are mounted on the ceiling or cover a wall, they diffuse uniform light and can be implemented in virtually any form, to the exact millimeter.
