TECTON is the world's first continuous-row luminaire system to have a 7-pole current conducting section built into its trunking. TECTON copes effortlessly with various lighting requirements – at the time it is installed and whenever there are changes. The trunking system forms the functional backbone and then it is simply a matter of replacing or adding luminaire elements, light sources or optics as required.

**TECTON: A complete system**

Select trunking options, then choose luminaires.

**TECTON LED Linear and Trunking System**

TECTON LED Linear is the new generation batten that easily snaps to Zumtobel's award winning TECTON trunking system. Featuring industry-leading efficacies of up to 148 lm/W and a smaller, cleaner stylistic design with five optical distributions.

**Quick Installation**

TECTON-compatible luminaires are quickly and securely installed to the TECTON trunking system thanks to a system that provides audible clicking and visible locking. Tried-and-tested features, such as plug&play and no-tool installation, make the TECTON product family time and cost efficient.

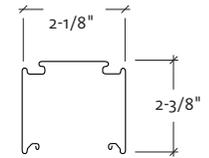

*TECTON Trunking Options*

PENDANT      SURFACE

Trunking Lengths

- 39" (1000 mm)
- 59" (1500 mm)
- 79" (2000 mm)
- 118" (3000 mm)
- 157" (4000 mm)
