

ZUMTOBEL

*CRAFT*

High-bay industrial luminaire

The image shows a high-speed train, primarily white with blue and yellow accents, moving rapidly through a large, arched tunnel. The train is blurred to convey speed. The tunnel's interior is characterized by its corrugated metal walls and ceiling, which are reinforced with a grid of bolts. A series of bright, rectangular industrial light fixtures are mounted along the ceiling, creating a strong, focused illumination. In the background, a blue maintenance vehicle is visible on the tracks, and stacks of materials are piled on the left side of the tunnel. The overall atmosphere is one of modern infrastructure and advanced lighting technology.

## Industrial Lighting

Warehouses

Factories

Retail

Civic Spaces

Sports Facilities

“When developing CRAFT, our exciting cooperation made it possible to create a luminaire with very high standards in terms of technical features and design. Moreover, the direct feedback and application know-how by our international lighting team helped us meet these requirements in a truly global product concept.”

Stephen Phillips | Arup

The high-bay LED luminaire CRAFT consistently illuminates high shelves with narrow aisles top to bottom, yet also performs in spacious areas, where its unique square distribution generates uniformity with a precision never before achieved.

#### CRAFT narrow beam

In warehouses, the challenge is to illuminate long and high rows of shelves as uniformly and efficiently as possible. The narrow-beam optic by Zumtobel has been designed, developed and manufactured especially for this application.

#### CRAFT wide beam

Based on requirements made by industrial applications, CRAFT features a wide beam optic which has been optimized for production areas. The unique square light distribution makes it simple to plan lighting like a checkerboard.

(+113°F on high lumen package)

CCT: 4000 K | 6500 K CRI: 80+ | 70+

Beveled luminaire surfaces prevent dust from accumulating.

The CRAFT wide beam and the CRAFT narrow beam versions, industrial luminaires meet all requirements in terms of uniform illumination of bays and efficient lighting of high-bay storage facilities. Each LED has been assigned a separate lens. This ensures that the light is directed very precisely as well as providing good glare control and outstanding efficiency.

In order to ensure perfect cooling and minimum maintenance effort, CRAFT creates air flow through the luminaire. This chimney effect sustainably protects the technical components from overheating and optimizes the luminaire's service life.

Pendant, surface-mount, or TECTON compatible

Unique light distribution

Compact and lightweight construction

Effective thermal management and dust prevention

### Less Dust Deposits

Conventional luminaire

CRAFT with chimney effect

Weighing only 13 lbs (CRAFT M) and 22 lbs (CRAFT L) the compact luminaire is over 50% lighter than competitive products

CRAFT narrow beam illuminates long and high rows of shelves uniformly and efficiently in warehouses

CRAFT wide beam creates a rectangular light distribution, optimal for production areas

LED boards are arranged at both sides of the driver, allowing perfect thermal management and ambient operating temperatures from -40°F to +131°F

Extensive open rib structure prevents accumulation of dust

TECTON compatible luminaire for quick and easy installation
